OVERVIEW

ECTL SHE Management System is a **web based** application designed to manage issues that are related to Safety, Health and Environment in a company. The major components of ECTL SHE includes :
- **Data Collection** (SHE, Waste & Energy)
- **Dynamic Workflow** (on work approval, escalation and processes)
- **Knowledgebase** (repository for documented legislations)
- **Historical Reporting** (generated reports from stored data)
- **Dashboard** (intuitive & informative Dashboard)

Data Collection

Dynamid Workflow

Knowledgebase

Dashboard

MODULES

AUDIT

Allows you to store all the related documents against company audits and to record any corrective actions and its progress.

APPROVAL WORKFLOW

Powerful workflow tools to enable customisation of multi-level approval workflows for various processes including audit and incident reporting. Also provides notifications and reminders functions

INCIDENT REPORT

Allows the capturing of incidents accurately and efficiently. Automated escalation and reporting to pre-defined personnel.

LICENSES & CERTIFICATES

Provides a centralised and computerised storage for all licenses and certificates. Reminders function for renewable licenses or certificates before expiry dates.

SHE DATA COLLECTION

Collection of information of waste, by chemical produce and energy usage. Record, monitor and set KPI for usage and recycling targets.

DASHBOARD

Provides a user friendly and intuitive platform that gives you total visibility of various areas of concerns in your company. Informative graphs and charts gives you an effective visual analysis.

KNOWLEDGEBASE

Provides a centralised legislative & informative documents storage. Includes a power search function to quickly find the topic of concerns.

HISTORICAL REPORTING

Dynamic report builder that outputs historical information in intuitive graphical formats. Supports various output formats such as excel, powerpoint and csv.

SHE AT A GLANCE

01

ONE STOP MANAGEMENT SYSTEM

ECTL SHE system allows access to all SHE related information in one single system from various sources. This helps reduce duplication of information and reduce costs.

Comprehensive & cost saving

02

HIGHLY CUSTOMISABLE

ECTL SHE system is designed to be highly customisable by end users themselves. This will help cater to the diversity in different business requirements

Flexibility

03

USER FRIENDLY PLATFORM

ECTL SHE system is made user friendly by utilising drop-boxes, corrective spell checking and standardised unit of measurements to minimise human input errors.

Ease of use

04

AUTOMATED WORKFLOW

This feauture allows highly configurable workflow for different processes. It is multi-leveled and has reminders built for each actionable item.

Increased Efficiency

05

HIGHLY ACCESSIBLE

ECTL SHE system is web based and thus it works across various platforms of hardware and operating systems.

Versatile

06

INTUITIVE DASHBOARD

ECTL SHE system has a dashboard that capture attention and at the same time deliver accurate and meaninfgful information.
